

government, such as the District.

Whereas, the ordinance shall detail the purpose and cost savings to be achieved by such dissolution and be published in a newspaper of general circulation served by the unit of local government, and on the county's website.

Now, therefore, be it ordained that the Board of the County of Lake proposes the dissolution of the Slocum Lake Drainage District.

Be it further ordained, that the County Board proposes that, under the provisions of 55 ILCS 5/5-44025, the Slocum Lake Drainage District be dissolved, and its functions devolved to the municipalities and township that overlap with its territory.

Be it further ordained, that costs inherent in operating the District are the administrative costs that the District incurs annual to maintain its existence as a municipal entity, as well as those costs associated with the work performed by County staff, including the staff of the County Clerk and Treasurer, to levy for taxes each year. Dissolving the District will eliminate these costs and residents of the District will no longer have a levy for the District on their property tax bills.

Be it further ordained, that upon passage of this ordinance, the County will work with the District to have an audit performed detailing all claims against the District, its receipts, an inventory of the real and personal property it owns or controls, and any debts owed by it. After the audit is reported to the County Board, the Board will adopt a separate "authorizing ordinance," as set forth in 55 ILCS 5/5-44025, and thereafter petition the Circuit Court for an order designating a trustee-in-dissolution for the District.

DATED on this 13 day of August, 2024, by the County Board of the County of Lake, Illinois.
