

# Psychiatric Hospitalizations

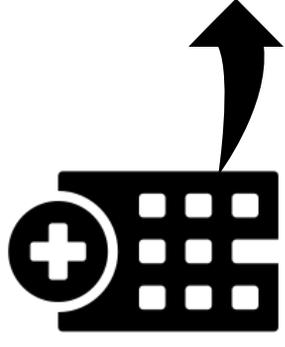

Sam Johnson-Maurello MBA LCPC RDDP  
September 27, 2017

# LCHD involvement with Psychiatric Hospitalizations

## Screen and Place into the hospital

- Any program potentially
- Specific screening functions for Crisis Care Program (adult) and Child and Adolescent Behavioral Services

## Receive referrals from the hospital

- Mostly to adult Outpatient Mental Health (psychiatry)

# CABS – Child and Adolescent Screening for Hospitalization

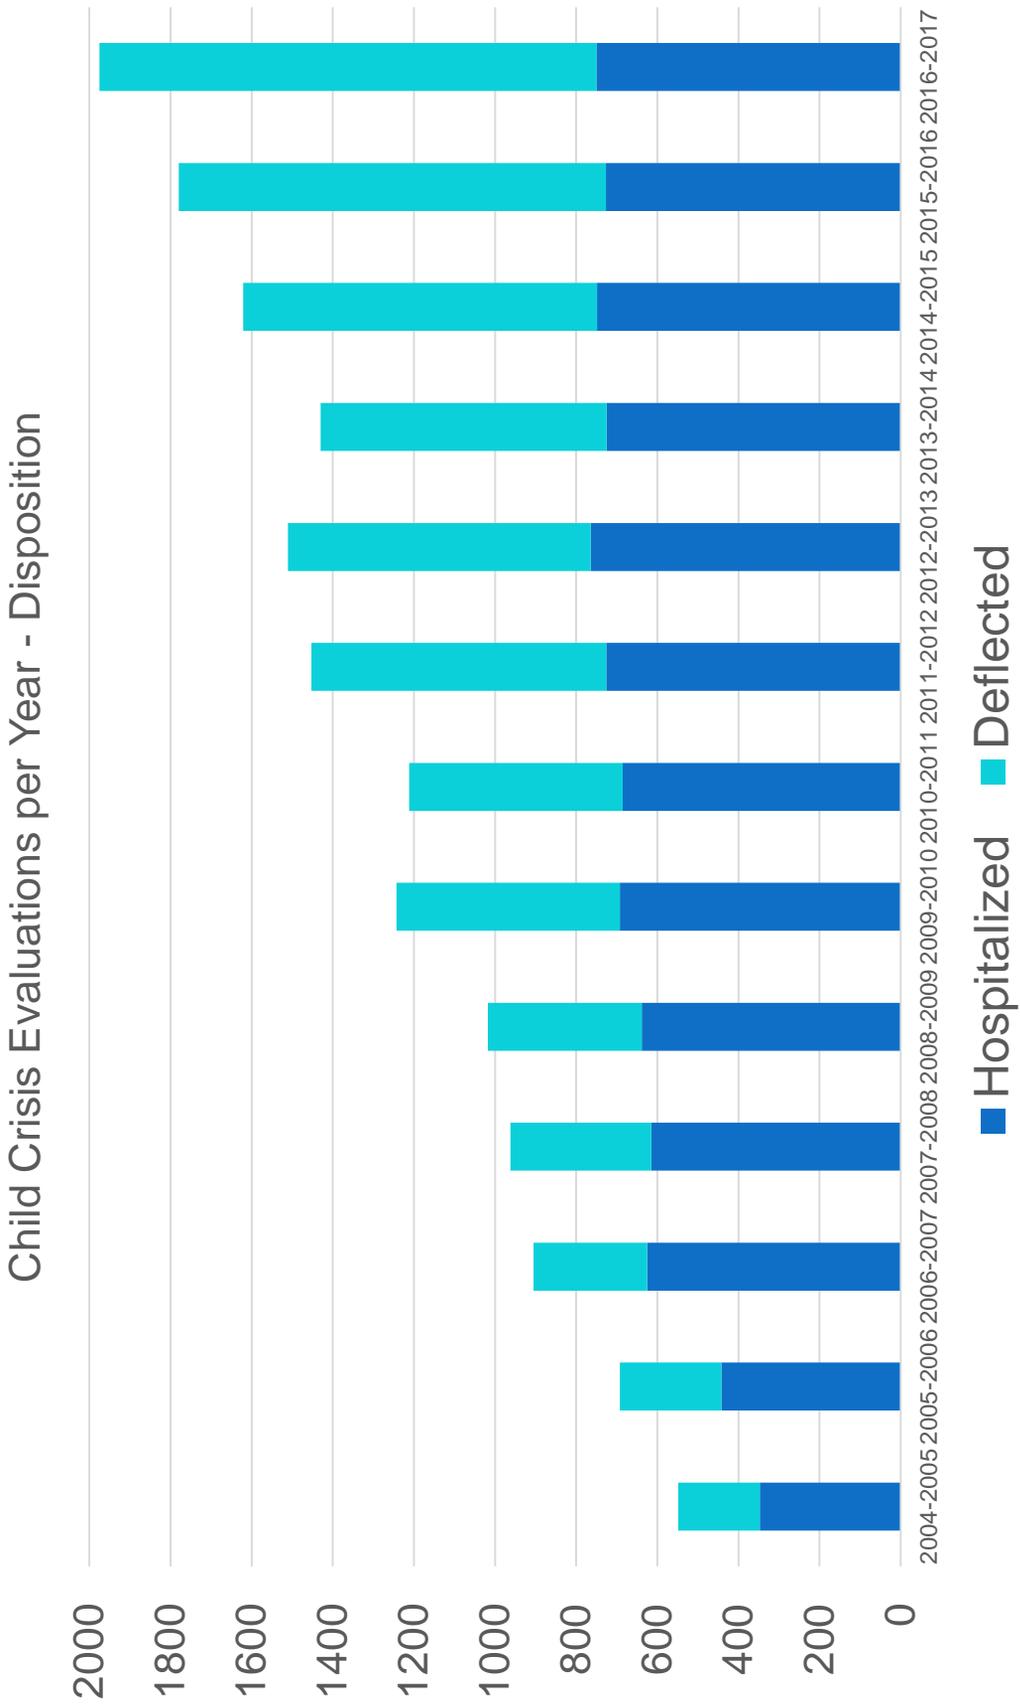

Evaluate youth...

- ages 20 and under who have Medicaid/Medicaid MCO,
- DCFS youth in care ages 20 and under and
- uninsured youth ages 17 and under

Screened at the site of crisis to determine the need for psychiatric hospitalization.

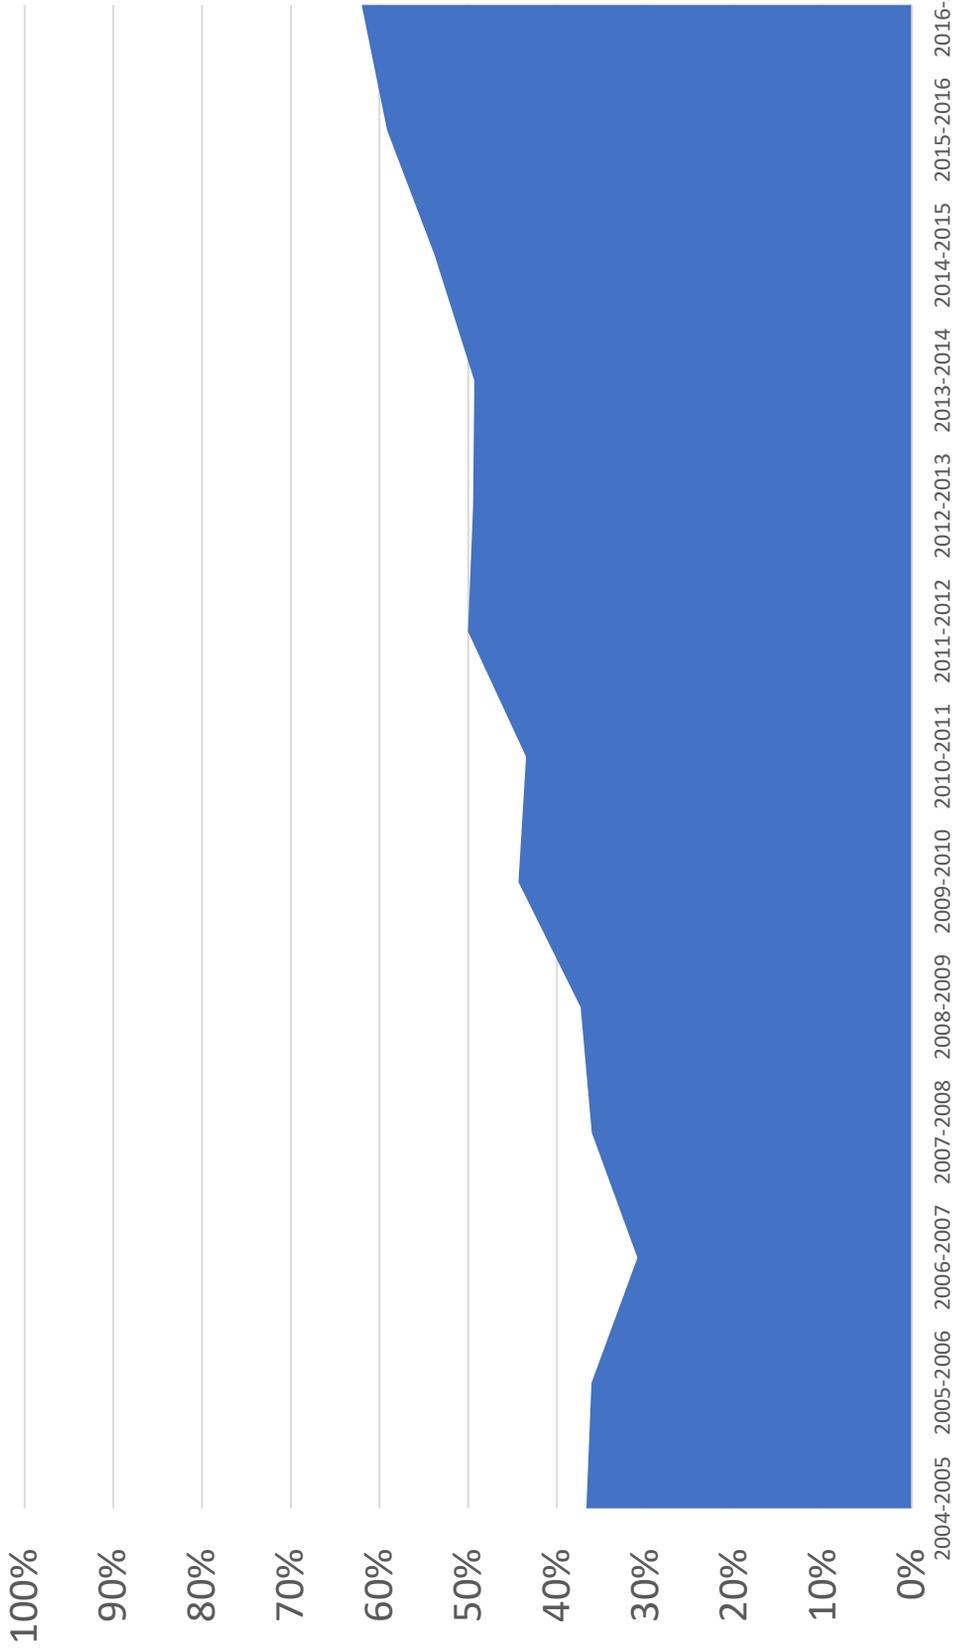

Youth who are screened receive 30-90 days of case management follow up.

# Child Crisis Screenings per Year 2004-2017

# Child Crisis Screenings – Deflections from Hospital

Percent of Child Crisis Cases Deflected from Hospitalization

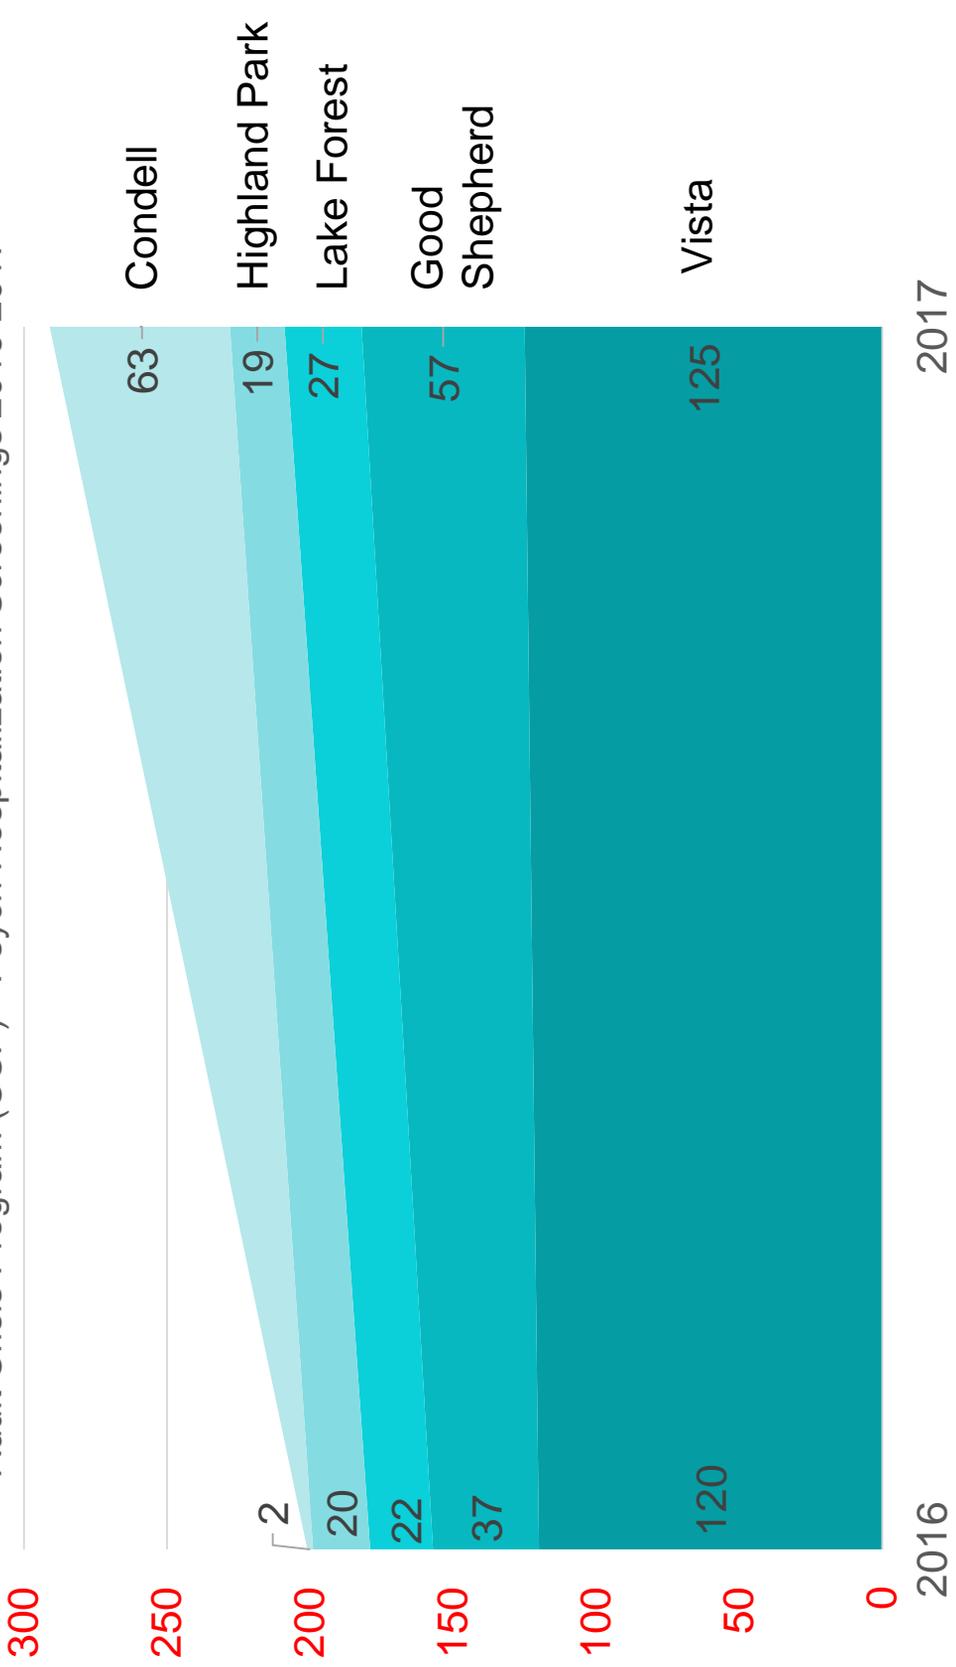

## CCP – Adult Screening for Hospitalization

Screen any uninsured adult who is at a Lake County hospital and being considered for psychiatric hospitalization.

Clients cannot be transferred to the state hospital (usually Elgin) without CCP staff screening.

# Adult Crisis Program Screenings

Adult Crisis Program (CCP) - Psych Hospitalization Screenings 2016-2017

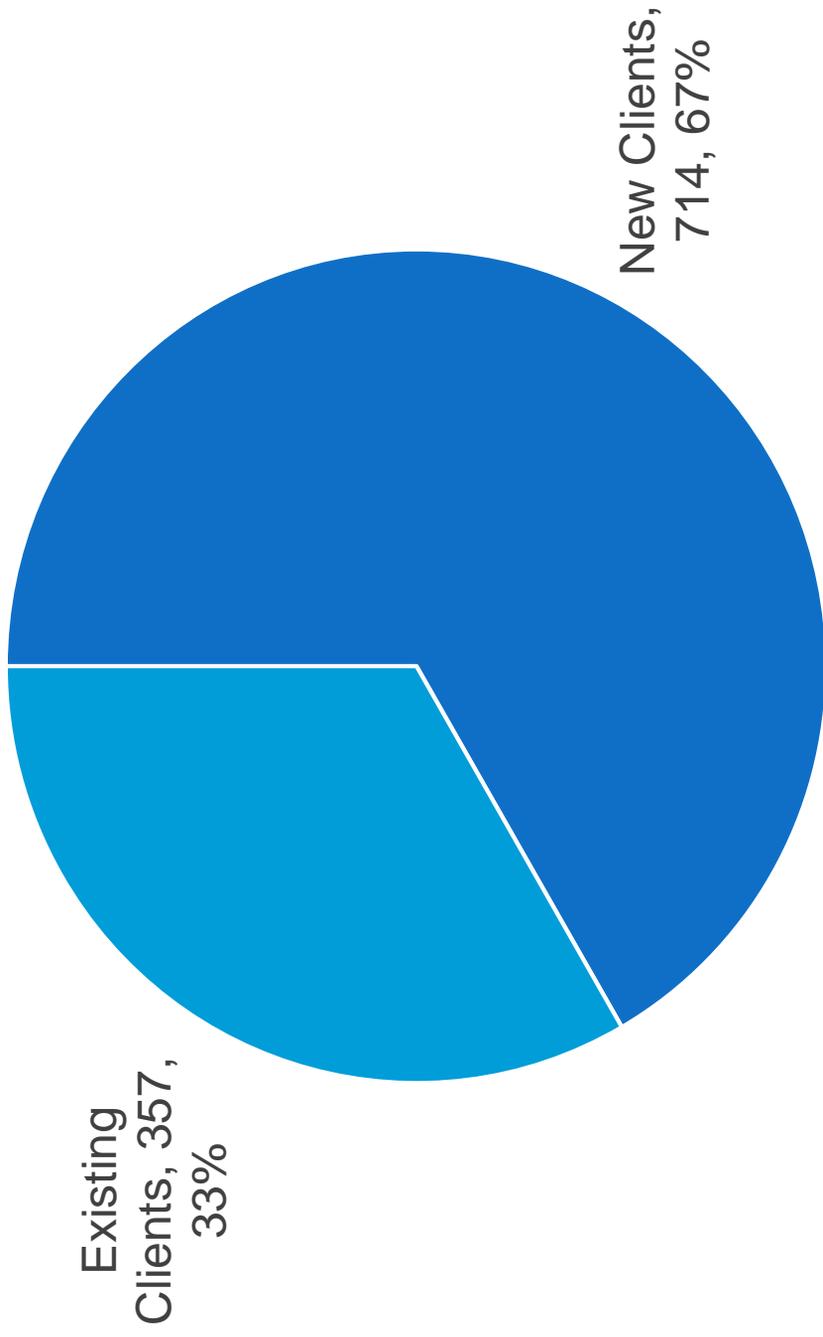

# Adult Outpatient – Referrals From Hospitals

Post-hospital referrals are made to us usually because:

- No one in area takes person's insurance
- Person has no insurance
- Pre-existing client

# Referrals from hospitals – number and type

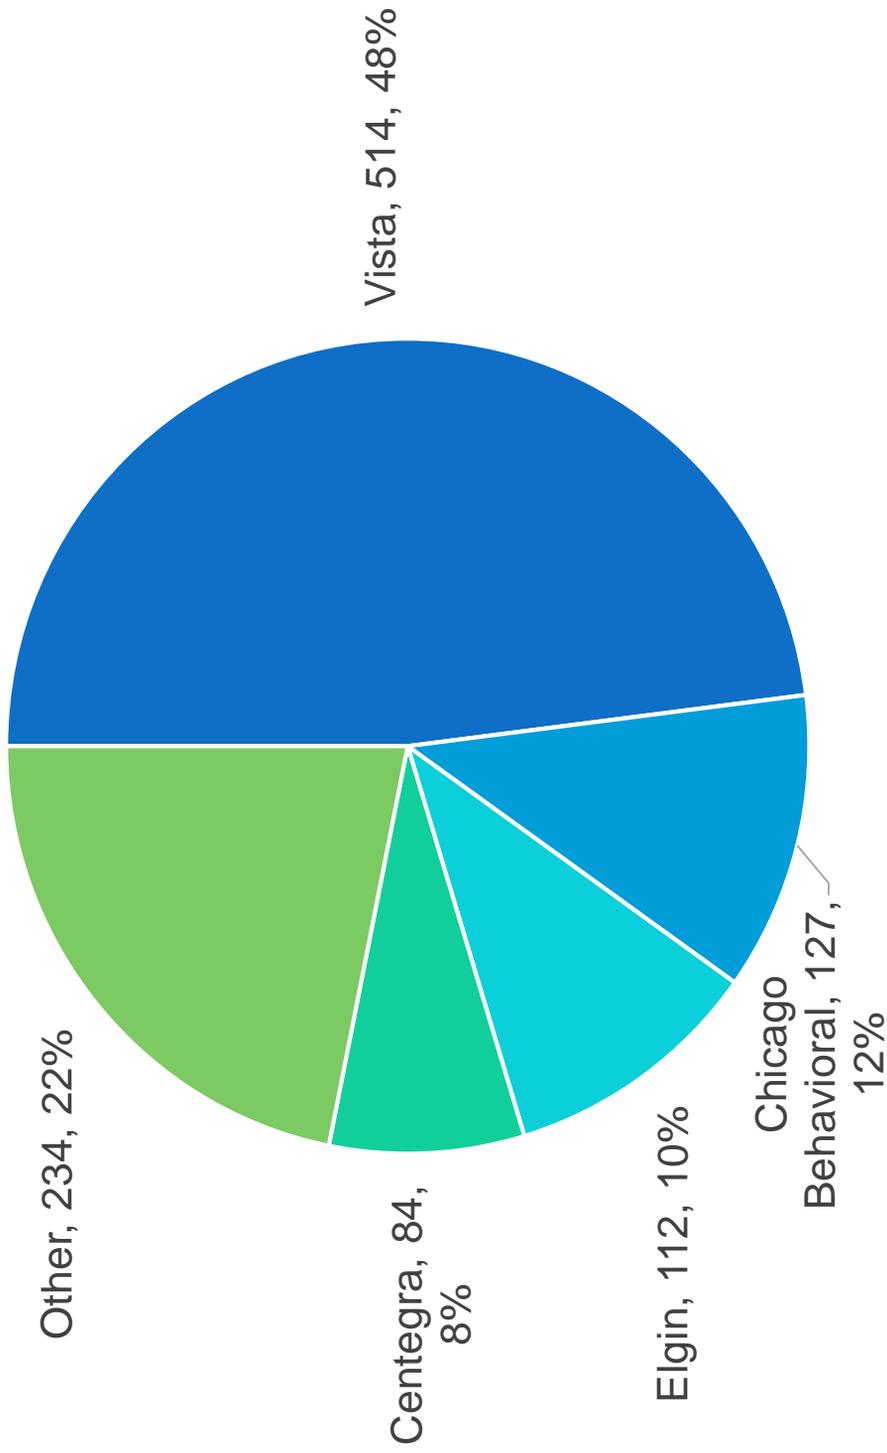

TYPE - Referrals from Hospitals to Adult BH Services, 12 months (9/16-8/17)

**1071 Total Referrals from Hospitals**

# Referrals from Hospitals - Source

SOURCE - Referrals from Hospitals to Adult BH Services, 12 months (9/16-8/17)
