(2) Non-Coroner's Cases:
Cases reported to the Office of Coroner where Minimal Investigation is needed; primarily consisting of review of medical history, medical records, and discussion with health care providers involved in the case.

(3) Coroner's Cases
Thorough investigation as to the cause of death, with subsequent Case Conference to determine the manner of death (i.e., homicide, suicide, accidental, or undetermined). Where required and mandated by Illinois Statute by type of death, select cases may be sent to an Inquest by Jury.

(4) Data reported is from the month prior to the reporting month to allow more complete data.
