TASK SB10: RIGHT-OF-WAY DETERMINATION

Boundary line determination for the existing right-of-way of Old Skokie Right-of-way (approximately 1,500 lineal feet) through research of documents at the County Recorder’s office, field location of existing monuments and office calculations. Preparation of legal descriptions, exhibits or plats for right-of-way dedications would be completed as an additional service.

TASK SE2: PROPERTY LINE ALIGNMENT

Research record plats, maps and/or documents and determine the approximate location of the property lines within the Manufactured homes development for use in developing the Plat of Easement detailed below. This work does not include the preparation of a Boundary Survey and property lines would be shown based on record plats, maps and/or documents.

TASK PE: PLAT OF EASEMENT

Prepare a Plat of Easement for recordation at the County Recorder’s Office. This Plat would be prepared in accordance with municipal standards for plats and would include the depiction of the easements, owner’s certificates and municipal certificates and standard easement provisions. All revisions to the Preliminary Engineering after initial completion by the Engineer would be completed as an additional service. - A. Existing Conditions Base Flood Analysis
Determine the flows generated through the site in a 100-year storm and identify inundation areas as applicable. Prepare a StormCad analysis on the existing 30-inch storm sewer to determine its capacity and ability to take additional flows from the proposed 24-inch storm sewer.
- B. Proposed Conditions Analysis
Optimize the proposed compensatory storage area to alleviate flooding in the area. Prepare a StormCad analysis on the proposed 24 inch storm sewer and the existing 30 inch storm sewer to ensure that no downstream areas are adversely affected by the improvements.
