

**INTERGOVERNMENTAL AGREEMENT
Advanced Traffic Management System (ATMS)**

This Intergovernmental Agreement is entered into as of this ____ day of _____, 2024 by and between the County of Lake (COUNTY), a County duly constituted under the Constitution of the State of Illinois and the State of Illinois, acting by and through its Department of Transportation, hereinafter referred to as the (STATE).

WHEREAS, the STATE and the COUNTY are authorized by the terms and provisions of Article VII, Section 10 of the Illinois Constitution of 1970 and by the Intergovernmental Cooperation Act, 5 ILCS §220/5, to enter into Intergovernmental Agreements, ventures, and undertakings to perform jointly any governmental purpose or undertaking either of them could do singularly; and

WHEREAS, the COUNTY has set a course to design, operate, and maintain an Advanced Traffic Management System (ATMS), to be housed in the CENTER in the COUNTY Division of Transportation's offices and has determined that it is in the best interest of the COUNTY to deploy and operate this system in coordination with the STATE; and

WHEREAS the STATE agrees it would be in its best interest to work with the COUNTY in the design, operations, and maintenance of this ATMS; and

WHEREAS, the Parties have agreed to enter into this Agreement in order to memorialize their respective responsibilities and obligations within the ATMS; and

NOW, THEREFORE, in consideration of and in reliance upon the mutual covenants, agreements and conditions hereinafter set forth, the parties hereto agree as follows:

Modification

1. It is mutually agreed by and between the parties hereto that EXHIBIT C and EXHIBIT D of THIS AGREEMENT may be amended by Letter of Concurrence signed by both parties to add, delete, or modify EXHIBIT C or EXHIBIT D content at the end of each quarter with changes effective the following quarter. Said additions, deletions or modifications may result in changes to the respective cost-sharing responsibilities of the parties hereto, as these relate to Exhibit C. Operational change approval coming from STATE personnel are reflected in EXHIBIT D. The COUNTY ENGINEER shall act on behalf of the COUNTY as said actions relate to changes to EXHIBIT C or EXHIBIT D, and the State Regional Engineer and its Engineer of Operations shall act on behalf of the STATE as said actions relate to changes to EXHIBIT C or EXHIBIT D.

Design and Construction of ATMS

2. (a) It is mutually agreed by and between the parties that the COUNTY may propose, from time to time, for the approval of the STATE, the integration of additional STATE traffic control signals into the ATMS. Upon approval by the STATE to permit incorporation of its traffic control signals as part of the ATMS, the STATE agrees to cooperate with the COUNTY by providing, at no cost to the COUNTY, all necessary plans, specifications, and drawings of the existing traffic control

signals and equipment and to make every effort to enable the COUNTY to integrate the proposed and approved additions into the ATMS.

- (b) It is mutually agreed by and between the parties that the STATE may propose, from time to time, the integration of additional STATE signal systems into the ATMS. The COUNTY agrees to cooperate with the STATE by providing, at no cost to the STATE, all the necessary plans, specification, and drawings of existing equipment and to make every effort to enable the STATE to integrate the proposed and approved additions into the ATMS.
- (c) Except when established otherwise under a separate, project-specific agreement, the proposing party of any and all additions and integrations to the ATMS shall be responsible for all costs associated with the design, construction and integration of said proposed traffic signal system additions or integrations or other ITS field devices proposed to be added, including, without limitation, dynamic message signs, highway advisory radio, remote weather information stations, Traffic Monitoring Cameras (cameras), etc.
- (d) The STATE shall retain the right to approve or reject the plans and specifications for the integration of any STATE traffic signal to the ATMS to the extent that such integration adversely affects the STATE's traffic control signals and equipment. The COUNTY will have the opportunity to provide input into the design process of any integration to the ATMS proposed by the STATE in order to support and maintain the integration of the whole signal system(s).

Operations of ATMS

- 3. The STATE will have the ability and right to monitor and operate the STATE traffic signals at the STATE's District 1/Region 1 office or remote locations from a remote network connection established by the COUNTY.
- 4. The ATMS will provide function to existing interconnected signals currently under the jurisdiction of or maintained by either COUNTY or STATE. The agencies agree to operate these interconnected signals in accordance with the following guidelines:
 - (a) The COUNTY will provide a means for the STATE to have remote capabilities to gain access to and make use of the ATMS such as from an existing STATE workstation. Through the existing workstation, STATE will have the same functional capabilities as the COUNTY will have from the CENTER. Through implemented security features, STATE will have the sole administrative rights to all STATE traffic signals or devices connected to the COUNTY traffic signal system except as noted in Paragraph 4d. The STATE will also have the ability to view the status of COUNTY signals on the system, but STATE may be restricted from changing the status or configuration of any signals that are the jurisdiction of or maintained by COUNTY. Conversely, COUNTY will have the right to view the status of all STATE signals, but COUNTY may be restricted from changing the status or configuration of any signals that are the jurisdiction of or maintained by STATE, except as otherwise provided herein. Security restrictions will not be in place initially, but the ATMS shall be functionally capable to implement such restrictions at a time mutually agreed upon by both STATE and COUNTY.

- i. The COUNTY and STATE mutually agree that the COUNTY will provide remote access to its network for the sole use of STATE personnel and their agents with functionality and capabilities that are mutually acceptable to STATE and COUNTY.
 - (b) The initial deployment of the ATMS will enable the STATE's Electrical Maintenance Contractor (EMC), the STATE's Traffic Signal System Monitoring Consultant, and the STATE's Signal Coordination and Timing Consultants (SCAT) to access the ATMS from multiple independent remote locations in order to monitor and maintain the STATE's traffic signals. Concurrent access of the COUNTY ATMS may be limited by the number of virtual workstations.
 - (c) To the extent the ATMS is capable, the ATMS will provide the support for coordinated response to unusual traffic conditions or events. This may include using predefined conditions (developed in future coordination between the parties) to store and implement pre-established system responses. The stored ATMS responses may include messages for Dynamic Message Signs (DMS), COUNTY web page, and messages to the Gateway Traveler Information System or other regional traffic operation organizations. In addition, the responses may include suggested changes to selected timing plans implemented at specific signalized intersections.
 - (d) Any desired signal timing adjustments plans to include those for incidents or special events will be developed jointly by the COUNTY and STATE. The conditions (or rules) in which a special timing plan will be recommended for use will also be jointly developed by both parties. When the jointly agreed conditions occur, the ATMS or personnel from the COUNTY may recommend the implementation of a special timing plan. Special timing plans that affect operations along STATE highways will be implemented by ATMS system owner or IDOT personnel only after the approval from the STATE personnel which has been specifically identified in EXHIBIT D attached hereto and made a part hereof. Only approved STATE personnel will have the right and capability to authorize any changes to traffic signals that the STATE has jurisdiction or maintenance of, unless otherwise directed by the STATE. Changes to traffic signals that the STATE has jurisdiction or maintenance of without prior approval from IDOT personnel will result in termination of administrative rights.
 - (e) COUNTY ATMS systems shall have the capability to run Traffic Responsive Programmed (TRP) signal systems. If future integration of STATE signals into the ATMS requires TRP, then the cost of TRP program development, implementation, and related maintenance will be paid for by the agency requesting the integration of STATE signals.
5. The COUNTY ATMS and CENTER will include cameras. The cameras will be used solely for traffic, incident, and event management purposes. Both COUNTY and STATE will have the right to pan, tilt, and zoom the cameras. No system-based control restrictions will be placed on the cameras. Both parties will be able to view images from the cameras simultaneously.
- a) The COUNTY reserves the right to enter into agreements with local law enforcement agencies for purposes of sharing limited video access to support

public safety. All agreements with these agencies will include the same terms for allowing access as are included in this AGREEMENT. For local law enforcement agreements that include one or more State signals, the State shall review for comment and approval.

- b) The COUNTY reserves the right to provide still image snapshots from cameras to the public through a COUNTY and regional website, smartphone apps, and social media platforms. Snapshot images may be archived by the COUNTY for a select period of time.
6. The ATMS may support features for both the gathering of traffic signal data and the distributing of this or other data to other agencies or private parties. It is understood by STATE and COUNTY that any data gathered by the ATMS is for COUNTY and STATE uses. Each agency has the right to share data for traffic signals it has jurisdiction of, but data for traffic signals under the jurisdiction of the other agency will not be shared unless both STATE and COUNTY provide written confirmation on the details of its distribution, subject to all applicable State and Federal laws.

Maintenance of ATMS

7. The ATMS relies upon an Ethernet communications backbone that utilizes fiber optic, cellular, and wireless communication strategies. The COUNTY agrees to configure, update, and maintain the Ethernet communication equipment which may include network switches (layer II and III), encoders, terminal servers, firewalls, media converters, Highway Advisory Radios, communication cabinets, stand-alone cameras, ethernet cables, and associated power supplies through its Electrical Maintenance Contract (EMC) and/or a separate ATMS support consultant contract. The STATE retains the right to review the contract(s) at any time and COUNTY agrees to provide such contracts to STATE upon request. The STATE agrees to provide the COUNTY, COUNTY EMC, and COUNTY ATMS support consultant(s) access to STATE traffic signal cabinets for the intended purpose of maintaining and repairing Ethernet communication equipment.
8. System field maintenance portion of the COUNTY ATMS system shall include but is not limited to network engineer services for Ethernet communication equipment including switch configuration, reconfiguration, IP address assignments or reassignments, routine network monitoring, software updates, security patches, port configuration, port enabling, replacement, updating firewall as needed, licensing and network troubleshooting. System field maintenance costs are the responsibility of the COUNTY unless otherwise modified by agreement.
9. All other field equipment installed or subsequently integrated into the ATMS at a traffic signal location, including ethernet based traffic signal controllers, Malfunction Management Units, Uninterruptible Power Supplies, detection systems, cameras, cellular modems, fiber optic cable, fiber optic jumpers, fiber optic interface panels and interconnect conduit in the field, will continue to be maintained by the party which has jurisdiction of the traffic signal location unless otherwise agreed by the agencies in a separate maintenance agreement. For cellular modems, the modem is to be configured by the ATMS agency to provide proper connection and security.

The STATE agrees to maintain fiber optic cable and conduit placed in the STATE's Right of Way unless otherwise agreed to in a separate maintenance agreement. The

COUNTY agrees to maintain fiber optic cable and conduit in the COUNTY's ROW. Maintenance of COUNTY fiber optic cable when approaching a STATE intersection will cease at the furthest signal related hand hole (having detection or signal cable in it). Maintenance includes responding to requests to locate fiber optic cable and conduit and troubleshooting communication outages. Coordination between the STATE and COUNTY is required when testing fiber optic cable and considering the use of spare fiber optic cables. If no spare fiber optic cables are available, the fiber optic cable owner shall arrange for the replacement of the fiber optic cable as soon as possible.

10. The COUNTY shall be responsible for any and all costs associated with the installation of hardware and software at the CENTER and for delivering the remote capabilities to the STATE as outlined in paragraph 4(a)(i); provided, however, that the STATE shall have the right to inspect the CENTER hardware and software at any time.
11. The COUNTY shall provide, at no cost to the STATE, access to ATMS and/or signal system software. Remote users shall include IDOT District 1 Bureau of Traffic Office, IDOT Communication Center/Travel Midwest, STATE EMC, STATE Monitoring consultant, and STATE SCAT Consultant. Additional users may be added subject to ATMS capabilities.
12. If, in the event the ATMS or Ethernet communication equipment fails to operate, the COUNTY must make all reasonable efforts to restore appropriate communication with the STATE traffic signal system in accordance with the COUNTY's signal maintenance contract. The COUNTY shall provide the STATE with updates on the ongoing repair to restore proper communication.
13. It is also understood that if, in the judgment of the STATE, the COUNTY has not provided adequate maintenance for the Ethernet communication equipment, the STATE will give written notice to the COUNTY, and if adequate maintenance has not been provided within thirty (30) days, the STATE will arrange, at the COUNTY's sole expense to provide the appropriate maintenance efforts to bring said equipment to the required level of service for adequate operation.
14. The term of this Agreement shall commence as of the date hereof and shall continue for a period of ten (10) years from said date, and shall be automatically renewed thereafter for successive periods of five (5) years unless sooner terminated by either party as provided below; provided, however, that at any time during the term of this Agreement or any renewal period either party, with or without cause, upon not less than thirty (30) days provides prior written notice to the other party, terminate this Agreement; and provided, further, that at any time during the term of this Agreement or any renewal period the STATE shall have the right to terminate the Agreement immediately upon written notice to COUNTY in the event: (i) the COUNTY ceases to function as a local government entity, becomes involved in financial difficulties or becomes insolvent, or (ii) the COUNTY fails to maintain the ATMS or any other system related thereto in proper operating condition.
15. In the event that this Agreement is terminated by the STATE for any of the reasons described and listed in paragraph 14 herein, or any reason whatsoever, the STATE shall have the right to: (i) remove its traffic signals from the ATMS or any related system(s); (ii) return any and all other STATE controlled signal to the STATE's traffic control system; and (iii) take any and all necessary actions to maintain and control its signals

and its traffic signal system, and return the STATE system(s) to its original capabilities as though the ATMS was never in operation. In such case, the STATE will remove and return to the COUNTY any COUNTY owned ATMS equipment installed at STATE traffic signal locations.

16. All changes to this Agreement (including any changes to COUNTY's commitments or operations hereunder) must be mutually agreed upon by both parties hereto and be promptly incorporated by a written amendment signed by both parties.
17. This Agreement shall be binding upon and inure to the benefit of the parties hereto, their successors and assigns.
18. The terms of the Agreement shall be construed in accordance with the laws of the State of Illinois. Any obligations and services performed under this Agreement shall be performed in compliance with all applicable state and federal laws.
19. All notices required to be given under the terms of this AGREEMENT shall be in writing and shall be deemed to have been properly made on the day of service, if served personally, and on the second day following mailing, if sent by United States certified mail, postage prepaid, return receipt requested, addressed as follows:

If to the COUNTY:

LAKE COUNTY DIVISION OF TRANSPORTATION
600 W. Winchester Road
Libertyville, IL 60048
Attn: Director of Transportation/County Engineer

If to STATE:

STATE OF ILLINOIS, DEPARTMENT OF TRANSPORTATION
201 W. Center Court - Region 1
Schaumburg, IL 60196-1096
Attn: Bureau Chief - Traffic Operations

With a copy to:

Illinois Department of Transportation
69 W. Randolph Street, Suite 2100
Chicago, IL 60602
Attn: Deputy Chief Counsel

20. In the event any provision of this AGREEMENT is found to be invalid or unenforceable by a court of competent jurisdiction, such determination shall not invalidate or render unenforceable any other provision of this AGREEMENT.
21. The provisions set forth herein represent the entire agreement between the Parties and supersede any previous oral or written negotiations, discussion or agreements regarding the matters described herein, it being the intent of the Parties to provide for a complete integration within the terms of this AGREEMENT. No provision of this Agreement may be modified or changed in any respect unless such modification or change is in writing, duly approved and signed by both Parties.

22. This AGREEMENT shall be executed in duplicate, and each party shall retain a fully executed copy, each of which shall be deemed an original.
23. This AGREEMENT and the commitments made by STATE herein are contingent upon and subject to the availability of funds. The STATE, at its sole option, may therefore terminate or suspend this AGREEMENT, in whole or in part, without penalty or further payment being required, if (a) the Illinois General Assembly or the federal funding source fails to make an appropriation sufficient to pay such obligation, or if funds needed are insufficient for any reason, (b) the Governor decreases the Department's funding by reserving some or all of the Department's appropriation(s) pursuant to the power delegated to the Governor by the Illinois General Assembly; or (c) the STATE determines, in its sole discretion or as directed by the Office of the Governor, that a termination or suspension hereof is necessary or advisable based upon actual or projected budgetary considerations. The COUNTY will be notified in writing of any such failure of appropriation or of a reduction or decrease in funds.
24. This AGREEMENT and the commitments made by the COUNTY are contingent and subject to the availability of funds. The COUNTY, at its sole option, may therefore terminate or suspend this AGREEMENT, in whole or in part, without penalty or further payment being required if the Lake County Board or the federal funding source fails to make an appropriation sufficient to pay such obligation, or if funds needed are insufficient for any reason. The Department will be notified in writing of any such failure of appropriation or of a reduction or decrease in funds.
25. This Agreement shall not be assignable by either Party hereto without the prior written consent of the other.
26. The parties represent and warrant to one another that the persons executing this Agreement on behalf of each party is duly authorized to do so. Execution by COUNTY has been authorized pursuant to a duly adopted Board Resolution dated _____, 2024 a copy of which is attached hereto as EXHIBIT A.
27. EXHIBIT B is reserved for future use and is not presently used.
28. The ATMS includes a Gigabit Ethernet communication backbone. The maintenance of the Gigabit Ethernet communications backbone will be provided by a contractor mutually agreed upon by both parties hereto. The COUNTY will administer the Gigabit Ethernet maintenance contract, but the STATE retains the right to review and approve the maintenance agreement at any time. The cost of this maintenance agreement will be split 50/50 between the STATE and COUNTY. The Gigabit Ethernet system maintenance will include programming and support of all the Ethernet equipment connected to the Lake County communications backbone, including all the switches in the field and the TMC.
29. Electrical energy charges for the communications backbone, including the Gigabit Ethernet system, and all new ITS field devices as described in Paragraph 3c, will be split 50/50 between the STATE and the COUNTY. The COUNTY will pay electrical energy charges and the STATE will reimburse the COUNTY for fifty (50%) percent of actual charges.

IN WITNESS WHEREOF, the Parties have entered into this AGREEMENT as of the later of the _____ day of _____, 2024, or the date the last Party signs the Agreement.
