Public Comment: Is the County planning to amend any of the eight (8) collective bargaining agreements that govern the employment of staff in the Sheriff's office in light of the ongoing and unprecedented nation-wide movement to reform policing and criminal justice? For example, I have started to review the contract governing the employment of police lieutenants and have found several areas in which it does not reflect best practices as identified by Campaign Zero. Is there any mechanism for public comment during the renegotiation of those contracts? (The current contract for the lieutenants automatically renews, so it's not clear that the Board is even planning to review it anytime soon, but I could, of course be wrong about that.)
