PLANNING & DEVELOPMENT

Lake County Stormwater Management Commission and McHenry County Planning and Development are excited to announce the annual dual-county MS4 Workshop on Friday, May 15th at the Lake County Central Permit Facility, Second Floor Conference Room, 500 W. Winchester Road, Libertyville or via Zoom.

Featured speakers will include Jeff Edstrom, with the Illinois EPA, who has unique insight into the Illinois EPA 319 grant program and green infrastructure initiatives. Additional presentations will provide guidance on the successful implementation of green infrastructure and maintenance that is vital for compliance and protecting water quality, followed by case studies of best management practices implemented within Lake and McHenry County's.

This program is designed to educate staff responsible for managing green infrastructure, fulfill training requirements for communities with MS4 Permits, and anyone interested in protecting our nation's water quality.

The Workshop will be hosted in a hybrid format (in-person and via Zoom). All participants will be eligible for 3 Professional Development Hours (PDHs). A light breakfast and refreshments will be provided for in-person attendees.

**Registration opening soon**

The Lake-McHenry MS4 Pollution Prevention Workshop is proud to be sponsored by the Des Plaines River Watershed Workgroup (DRWW). Learn more about this workgroup on their website at [drww.org](http://drww.org).
