

# **UDS Measure: Statin Compliance**

## **Presentation to Governing Council**

**Toni Steres, DNP, APRN, FNP-C, AAHIVS**  
*Director, Provider Operations*

# Statin

- A medication taken to lower the LDL (bad) cholesterol. Patients take the medication daily, and the cost is approximately \$10-15 a month (lower with a 90-day supply).
- Bad cholesterol likes to stick to the arteries, causing a reduced blood flow and the chance for a blockage or closure of the arteries.
- Statins lower the risk of having a heart attack or stroke in the future.

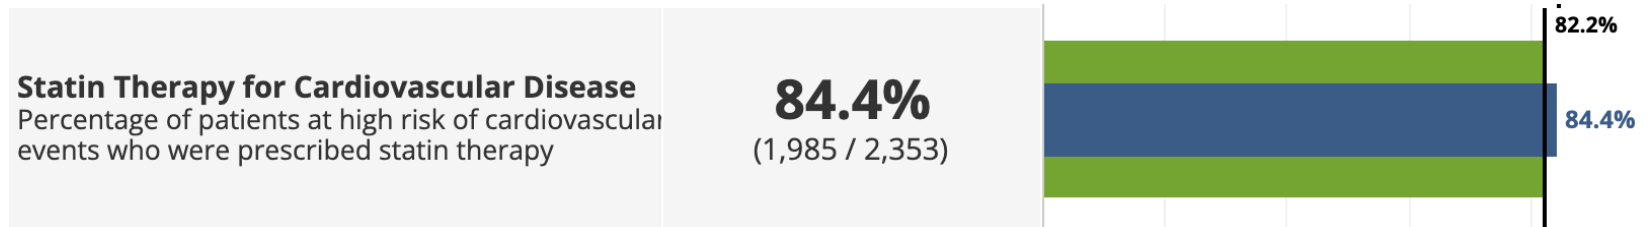

# What Conditions?

- History of a cardiovascular disease
  - Heart Surgery
  - Heart Attack
  - Stroke
  - At risk for the above
- Diabetes Type 1 or 2 between 40 and 75yo
- Anyone with an LDL > 190

We use a tool – ASCVD Risk – which measures the possible risk of any future event.

# UDS Measure

- Why are we focused on Statins?
  - Significant impact on patients' long-term health
  - Preventative

\*Green 2024 UDS submitted results

\*Blue 2025 current year to date results
