Hi Juli,

Please find attached the updated plans showing the delineated wetland boundaries, field-marked bore pit location outside of the wetland (approx. 3 feet of separation), and the stock pile also shown out of the wetland to the west.

Based on your message below with our LONI in hand, we will move forward.

As for the fee payment that you had asked about – the check that we had is now quite old. We will prepare a new check and send it over right away.

Thanks again for your responsiveness and support on this project.

Thanks,

tk

Alicia,

Thank you for the photo documenting the location of the bore pit west of Trillium being in upland. Per our field discussion, the soil stockpile area will also be shifted west of the location shown on the plan sheets so it, too, is in uplands. With these two field changes/clarifications, the LONI approval previously issued remains valid.

Given the tight construction timeframe, I am comfortable with Nicor initiating the work based on our field meeting and the area identified in the photo. Please email SMC a copy of the updated Site 2 map to show the boundary as delineated by Paul Bollinger, for our file records.

Thanks for your efforts on this!!

Juli

Subject: field marking of HDD pit for Rt 22 Trillium Court project

Juli,

Thanks again for meeting me and Paul last week at the project location for Nicor Gas' Trillium Court project. Our construction contractor has verified that we can place the HDD bore pit entirely within uplands, which overlaps the buffer area to the Site 2 wetland. This revised bore pit location is marked in the field with spray paint (see attached photo) and is at least approximately 3 foot outside the wetland boundary.

As we discussed, because impacts to Sites 1 and 2 are being avoided, authorization from the USACE is not required. Nicor Gas plans to update the map of Site 2 to depict wetland boundary as delineated last week, which will be a revision to the LONI for this project. Tom will take care of this submittal to your office to update the LONI.

We should still be on track to complete construction of this Route 22/Trillium Court project before June 1. I appreciate your help in maintaining this schedule.

Alicia Bishop
