Subject: Citizen Concern - Lucky Lake Sediment Runoff

Yamin,

Good morning, I received a phone call regarding sediment runoff and water discoloration into the Lucky Lake water body in Green Oaks, IL. Per the concerned citizens description, he states the sediment is coming from a large berm currently in progress of being built west of the tollway on presumably the 1003 W Park Ave parcels in Mettawa, as the citizen noted the berm is due west of the U.S. Post Office in Green Oaks across I94.

Green Oaks EO, William Rickert is all included as a recipient of this email as the water body receiving the sediment is in Green Oaks.

Please follow up with the concerned citizen MEHDI ALISTER for additional clarification, he can be reached at 847-502-8144 or malister382@gmail.com.
