Subject: Koffel berm stabilization failures

Adam,

Multiple failures have been observed on the Tollway side of the berm. I sent you 2 emails prior to this one (5/5/20 and 5/11/20) asking for a status update on the Geotechnical report. I have not received a response from you or John.

The design was not followed, we have expressed our safety concerns on the stability of the berm, and the failures continue. I have also received more drainage complaints from the Lucky Lake HOA immediately downstream of failed berm location. The photo below is a recent failure, photo taken yesterday, 5/26.

Lake County SMC will be escalating your case to the States Attorney's Office for further legal action to remedy the violation.

Kurt Woolford
SMC Chief Engineer
