Electronic Patient Systems Support Services - Nordstrom

Jerry Nordstrom, Director of Business Operations, reviewed the search process for a new supplier to provide EPS support services for NextGen and our complex use of NextGen. The current vendor, OSIS, was selected in 2013 but is no longer able to meet the changing needs of LCHD. The preferred vendor is eMedApps of Schaumburg. A handout detailing the process and the financials was given to the members present. He then opened the floor to questions and also noted that IT Director Doug Kasamis was also present to answer any questions. President Sashko mentioned that he and Mark Pfister also discussed this at a recent meeting and he sees no problem with it. Dr. Schuler asked how they went about determining the efficiency of it. Doug Kasamis reviewed the steps taken by MIS during the selection process. Dr. Welch asked if the references used were provided by the vendor or their customers. Per Jerry and Doug, references came from current customers. Dr. Ehrlich asked if data was being migrated or if data remained and its just the front end thats changing. Doug explained that data will migrate to the data center in Oakbrook. Dr. Ehrlich then asked if the vendor has a lot of experience with migration. Doug explained that the vendor's data migration methodology is sound and he is very comfortable with it.
