Joint resolution authorizing execution of an intergovernmental agreement (IGA) with CLCJAWA for sharing of costs associated with expansion investigation study.

- The NW Lake Michigan Water Planning Group has been actively investigating options for securing a source of Lake Michigan water, one of which is CLCJAWA.
- There is a limited amount of water that CLCJAWA can provide, 7.03 MGD max day, and therefore, not all NW members could be supplied.
- There are two groups of NW members that could potentially be served via CLCJAWA, one of which is the group the County would participate in as a user.
- CLCJAWA has proposed that they have their Engineer, CDM, develop the feasibility analysis for these options for \$60,200 and share the cost proportionately with NW Members via an IGA.
- The IGA has the County paying our proportionate share at \$7,224 for this work effort.
- This resolution authorizes the Director of Public Works to execute the IGA and all necessary payments for the sharing of Engineering Study Costs with CLCJAWA.
