

Lake County Illinois

Legislation Text

File #: 24-0682, **Version:** 1

Presentation and discussion from Waste Management on the life cycle assessment for the proposed waste transfer station in unincorporated Lake County.

- Waste Management has conducted a life cycle assessment (LCA) for its proposed waste transfer station in unincorporated Lake County directly south of the Countryside Landfill.
- A LCA analyzes four key parameters: net annual energy consumption, sulfur dioxide emissions, nitrogen oxide emissions and carbon dioxide emissions.
- The LCA must demonstrate that the proposed facility will be superior to the current system for at least three of the four parameters.
- Members of the public will have the opportunity to comment on the LCA.
