- The Emergency Telephone System Board (ETSB) owns and manages a Tellus CAD interoperability solution that connects nine individual CAD systems and interfaces with Lake County Traffic Management for data sharing and situational awareness of 130 public safety agencies since 2012.
- ETSB and partner agencies have the need to upgrade the existing Tellus software platform to utilize advanced features and patented programming for a better user experience including successful migration to a full CAD to CAD interoperability solution.
- Funding for the 9-1-1 system is provided by ETSB's collection of 9-1-1 fees that State law applies to land lines and cell phone bills.
- These revenues are programmed by the Lake County ETSB, and Lake County Government is the ETSB's fiduciary agent.
- In accordance with Article Six, Section 102 of the Lake County Purchasing Ordinance, the Purchasing Agent approved bid exemption on the basis that there is only one source for the required goods, service, or construction item, and there exists a long standing, successful relationship for software maintenance and support services, and the knowledge gained through this relationship adds value integral to the services provided for these services.
