Resolution authorizing a contract with Nearmap US, Inc., South Jordan, Utah, for aerial orthoimagery and oblique imagery, in an amount of \$135,000 for the initial one-year term with four, one-year term renewal options.

- Orthoimagery is remotely sensed imagery that provides an accurate view of the surface of the Earth.
- For a project beginning in Spring 2020, Lake County solicited formal written proposals from qualified firms for a hosted cloud service for annual multi-capture digital orthoimagery and oblique imagery.
- The Request for Proposal (RFP) was sent to 15 vendors and proposals were received from three firms.
- An interdepartmental committee reviewed the proposals and interviewed the top two firms.
- Based on the criteria set forth in the RFP, the evaluation group selected Nearmap US Inc. as the most favorable proposal for Lake County.
- The imagery obtained will provide consistent, contemporaneous digital aerial coverage that will support several regional applications, including homeland security, emergency services, environmental planning, and other services consistent with Lake County's Geographic Information Systems (GIS) program.
- The initial one-year term will cost \$135,000; subsequent renewals will be at a lower rate as detailed in Exhibit A attached.
