PHAB Update - Pfister

On Friday April 10, 2015, the Health Department submitted our final evidence to the Public Health Accreditation Board, thus concluding a yearlong documentation collection phase. Over 2,000 documents were reviewed and analyzed with only the best being selected for submittal.

To date, we have made several agency improvements:

- A measurable strategic plan linked to the Community Health Improvement Plan (CHIP) and to programmatic performance measures;
- An agency wide performance management system;
- Standardized quality improvement efforts in each Health Department program;
- Updated policies and procedures.

None, for information only.
